

# INDEX TO REGISTRATIONS

The following is a cumulative index of cultivars described in *The Genus Hosta List of Registered Cultivars* (Silver Book), *The Genus Hosta List of Registered Cultivars Supplement I*, and *The Hosta Journal - Registration Issues* 1999 through 2023. The second column indicates the year registered, the third column indicates years in which corrections or updates were made.

**Appendix A** lists names that are “established” by statutory plant authorities, and **Appendix B** documents names that, while not established by statutory authorities, are never-the-less not available for use in registering a hosta cultivar.

## Appendix A - Names Established by Statutory Plant Registration

A table of all hosta cultivars known to be established per statutory authorities is shown below. Cultivars listed are “established” via the legal protection(s) shown and thus are not available for use by anyone other than the original applicant. This information has been moved here to enable more efficient and timely modifications as needed. The presence of this information satisfies a number of requirements published in the *International Code of Nomenclature for Cultivated Plants – Ninth Edition* (hereafter referred to as the *Code*).

The *Code*, page 64, DIVISION IV: REGISTRATION OF NAMES states:

*“3) A statutory plant registration authority is an organization established by national legal enactment or by international treaty, which, as part of its remit, establishes variety denominations or other names for plants. Names established by statutory plant registration authorities **must be cited in the relevant register and checklist.**”*

The *Code*, Article 27.6 states:

*“A name that has not been accepted by the author who publishes it or **one that has only been provisionally listed** by an International Cultivar Registration Authority or statutory plant registration authority **is not regarded as being established.**”*

The *Code*, Article 11.4 states:

*“A name designated in a statutory register remains the accepted or adopted name **even after the lapse of the statutory protection** for the plant concerned.”*

Per the above sections of the *Code*, names established by the granting of Plant Patents or Plant Breeders’ Rights are required to be cited. Once established, names remain accepted even after the expiration date of the patent or breeders’ rights, or if rights are surrendered or withdrawn. Thus, expiration dates have been replaced with “grant” dates.

## Appendix B – Not Available for Registration [NAFR]

This table lists hosta epithets (names) that are not available for registration, is provided as a courtesy only, and will be revised as often as practical. There are various reasons why a name might be categorized as NAFR. Every effort has been made to provide justification for including an epithet in this table (please refer to the listed **Note**). The cited reference "International Code of Nomenclature for Cultivated Plants" is referred to as the *Code*.

### NOTES

- 1) Indicated name(s) were erroneously registered for plants that were non-existent. However, the historical existence of a published registration precludes the indicated name from being re-used in the future.
- 2) The *Code*, Article 31.5 states:  
 “Where, under the provisions of earlier editions of the *Code*, a name has been rejected and a replacement name has been provided, the rejected name may not now be accepted under the provisions of this *Code*.”
- 3) A cultivar name was changed after official published registration. The original name (no longer used) is now unavailable to be registered.
- 4) A cultivar epithet may not be established if it exaggerates the merits of the cultivar. Ex: *H.* ‘Shiniest Leaf’, *H.* ‘Chicago’s Finest’ and *H.* ‘Tallest in Town’ would not be allowed.
- 5) Trademarked names cannot be used as cultivar names. Reference the *Code*, Principle 6 and Division IV: Registration of Names #6.
- 6) Original registered plant no longer exists. Registration was relinquished to alleviate long-standing confusion in the marketplace.
- 7) Cannot be registered because of confusion with the Latin word. From Medieval Latin, *minūta* is a 60th of an hour.
