

During my first years as Registrar, I spent many hours researching answers to questions that ultimately have already been addressed by my predecessors. Since many of the same questions continue to arise, I resurrected many discussion topics gleaned from previous publications and updated each to reflect current practices and policies. I have also worked closely with Don Rawson and Warren Pollock to provide further improvements to the Cumulative Index that should enable everyone to more easily gather registration information. Within the discussion topics on pages 5 - 7 are references to web addresses where additional information can be found. For those with no computer access, please call and I will make sure you get hard copies of desired materials.

I wish to thank all those who submitted registration applications this year. This year 114 new registrations were added and 2 registrations were rescinded, for a total of 5859 registered hostas.

Respectfully submitted,

Gayle Hartley Alley

### International Code of Nomenclature for Cultivated Plants (ICNCP) Ninth Edition

... is the official publication incorporating the Rules and Recommendations for naming plants in cultivation. The Ninth Edition of the ICNCP was published by the International Society for Horticultural Science (ISHS) in June 2016. Hereafter, the ICNCP will be referred to simply as “the *Code*.”

### Name Release Form

Per the *Code*, permission must be granted for a real person’s name to be used as the registered name of a cultivar. Permission forms are available from The American Hosta Society or the Hosta Registry at:

<http://www.americanhostasociety.org/RegisteringHosta/name-release.pdf> or

[http://www.hostaregistrar.org/registration\\_form-printable.html](http://www.hostaregistrar.org/registration_form-printable.html)

### Photograph Requirements

The AHS assembled a team late in 2015 whose purpose is to assemble and publish photographs of all registered hostas. Historically, digital photos were requested to be reduced in size before submittal to the registrar. This policy was enacted to conserve hard drive space and to enable efficient emailing. Commencing in 2017, all photographs should be submitted with no reduction or file compression. Registrants are asked to supply a minimum of three photos per registration: one of the entire clump, one close-up showing a representative leaf and one close-up of the flower. Please provide the photographer’s full name and the date each photo was taken. With registration photos being published, it is important to portray your cultivar’s noteworthy feature(s). For example, if red spotted petioles make your hosta unique – provide a photograph that adequately showcases this characteristic. There is no limit on the number of photographs that may be submitted.

### Registration Errors

As has been the policy for a number of years, clear typographical and/or data entry errors are easily corrected by updating the database itself and by publishing those corrections within this document. Anyone finding what they believe to be such errors is encouraged to contact me so corrections may be published.

Not so straight-forward are instances where the published data accurately reflects the registrant’s information at the time the registration was approved and published, yet later proves to be misleading or outright erroneous. In these cases, **the registrant must approve any changes.**

In cases where the original registrant is not available and obvious errors are noted, we strive to work with what we have as best we can. An example would be the registration of *H. ‘Love Pat’* that has been discussed in depth, yet still remains as originally registered. To allow the AHS Show Classification team to update and clarify their classification listings, the registrar’s office now sanctions the use of the following materials:

- *Mark Zilis’ Field Guide to Hostas* by Mark R. Zilis, 2014 (Q & Z Nursery, Inc. Rochelle, IL)
- *The Hostapedia An Encyclopedia of Hostas* by Mark R. Zilis, 2009 (Q & Z Nursery, Inc. Rochelle, IL)

**The official registration of hosta cultivars continues to be per the printed *Registrations* issue published each year.** We acknowledge that official registrations are a mere “snapshot in time” providing only static details. Registration data is gathered at a single geographic location and the state of maturity will vary from quite young to fully mature. Thus, original data may fall short of supplying complete, real-life details. When you have need for more information than what is contained in this document, you will find relevant, accurate, and interesting information in the reference materials listed above.

### Limitations of the Online Search Feature

As many people have noticed, what appears in the online Hosta Registry is not the same as what appears in the printed *Registrations* issue(s). While the online search feature has proven to be of great service to those doing casual research, the contents cannot be relied upon to accurately portray official registration details. Limitations imposed by the database used to manage the official data, and how that information is exported out for

subsequent import into a separate database, guarantees that discrepancies will occur. A full explanation of the rounding errors problem can be found on page 4 of the *Registrations 2010* issue. Similarly, fields that allow entering a range of dimensions (such as Scape Height) do not provide a range for the metric equivalent when viewed online. Examples of discrepant information also occur within pure textual data. An example which illustrates differences commonly encountered is shown below for *H. 'Curly Fries'*.

This information is provided as a reminder that official registration details are always per the printed Registrations issue published each year.

### Typographer's Quotation Symbols

New to this year's document is the use of proper quotation symbols instead of straight quotes. Straight quotes are left-overs from the age of typewriters when using one key for two different marks helped save space on a keyboard. Thanks to modern word processing features it is relatively easy to replace the old 'dumb quotes' with proper typographer's 'smart quotes.' The prime symbol, which looks like a dumb quote, is still used for denoting measurements such as feet and inches (5'2").

### Rounding of Dimensions

In the future, all registration dimensions will be rounded to the nearest tenth of an inch (English) or tenth of a centimeter (metric). Rounding dimensions to the nearest tenth means the published dimension will always be within .05 of the original before it was rounded. English dimensions submitted as fractions are converted to their decimal equivalent prior to being recorded in the database, and prior to rounding. The example below illustrates the rounding policy.

*A registrant submits a leaf size of 2 1/4" x 5/8". The decimal equivalent 2.25" x .625" is entered into the database. After rounding, the published size is 2.3" x .6". The first rounded dimension is only .05" different from the original, and the second is only .025" different. Both are insignificant, even in the realm of miniature leaf sizes.*

All conversions from metric to English (or English to metric), are done before any rounding occurs. A registration that submits metric dimensions are converted first to English, then rounded to the nearest tenth of an inch. Thus, a metric dimension of 4.75cm x 3.65cm, is first converted to English (1.870" x 1.437") and then rounded to be 1.9" x 1.4".

### Cultivar Name Establishment

To establish a cultivar name, the *Code* calls for registrations to appear in a suitable dated publication that is made publicly available. Thus, epithets that have not been published per this document are NOT guaranteed to be available for registration. Examples of how a name can be established outside of registration are: 1) if it has been listed in a nursery catalogue, 2) sold online under the name in question, or 3) a Plant Patent or Plant Breeders' Rights has been issued. Any of these scenarios might be sufficient to establish a name such that no one else can register a hosta using that name.

### AHS Name Reservation Policy

As the *Code* has no provision for name reservations, each plant society develops its own policies. To alleviate confusion, The American Hosta Society (AHS) adopted a formal policy on name reservations that was published in the *Registrations 2013* issue. After periodic revisions, the current name reservation policy is as follows.

“A cultivar name is reserved through the AHS Registrar. The reserved name does not require descriptive information, will be protected for a one time period of three years, and requires a \$10 reservation fee. A maximum of 15 reserved names may be held concurrently by any one registrant.”

Similar to the section titled “Cultivar Name Establishment,” a reservation is NOT a guarantee, it is a place holder that limits the ability for another person to register a plant using your reserved name. This protection does not extend into the three areas where names may be established outside of registration.

### Flowering Periods

Flowering periods may be entered using the codes per Key A (see instruction page of registration form) or using a “start-peak-finish” format (both options are available). If both types are entered, the more accurate “start-peak-finish” information will appear in the formal registration.

### Clump Sizes

There have been multiple changes in the registration form and the information required to adequately describe plant size. An option to indicate a general size description (miniature, small, medium, large and giant) was allowed at one point early on. After input and discussion, this option was discontinued in preference for utilizing dimensional measurements to indicate a plant’s height and width. This will remain standard policy, with the understanding that dimensions reflect clump size at the age and location recorded in each registration.

### Color Selection for Leaf and Margins

Commentary upon determining accurate margin or leaf colors was published in the *Registrations 2008* and *2009* issues. While no color charts have been provided online we recommend using charts provided by the Royal Horticultural Society when concerns about color arise.

### Indicating Ploidy in Registrations

A comprehensive discussion regarding ploidy was printed in the *Registrations 2009* thru *2011* issues. Current policy prohibits the inclusion of ploidy terminology within registrations unless scientifically verified.

### Cumulative Index to Hosta Registrations

The Cumulative Index of registered hostas is now provided as a stand-alone document and can be found at [http://www.hostaregistrar.org/hosta\\_registration\\_lists.html](http://www.hostaregistrar.org/hosta_registration_lists.html). Commencing with the 2016 index, each registration references the year it was registered (instead of the previous practice of listing *THJ* Volume and Registration Issue). Additionally, each entry now references all years in which corrections or additions have been published.

### Plant Patents, Plant Breeders’ Rights and Establishment

The *Code*, page 64, under DIVISION IV: REGISTRATION OF NAMES states:

3) A statutory plant registration authority is an organization established by national legal enactment or by international treaty, which, as part of its remit, establishes variety denominations or other names for plants. Names established by statutory plant registration authorities must be cited in the relevant register and checklist.

A table of all hosta cultivars known to be established per statutory authorities is now included as Appendix A of the *Cumulative Index*. Cultivars listed therein are “established” via the legal protection(s) shown and thus are not available for use by anyone other than the original applicant. See previous section (titled Complete Index to Hosta Registrations) for the web address where a copy of the latest *Cumulative Index* can be retrieved.

## Corrections and Comments

*H.* ‘**Academy Little Prother**’ (2011) – was originally registered with a typographical error and should have been registered as *H.* ‘**Academy Little Pother**’ (removed the “r” that occurred after “P” in the third word).

*H.* ‘**Bali Hai**’ (2009) – was originally registered with a typographical error and should have been registered as *H.* ‘**Bali-Hai**’ (added the hyphen).

*H.* ‘**Banana Puddin**’ (2005, corrected in 2009) included an apostrophe as a stand-in for the letter “g” in addition to the closing single quote required by the *Code* (two closing quotation symbols). The single quotation mark required by the *Code* to appear at the beginning and ending of each cultivar name, trumps the use of a stand-in apostrophe, and is to be used in place of a final stand-in apostrophe. Thus, the correct registered name should appear as: *H.* ‘**Banana Puddin**’ (single closing apostrophe).

*H.* ‘**Big B**’ (2016) – was originally registered with incomplete information in the leaf description. The leaf color should have been included as “dark green.”

*H.* ‘**Candy Kisses**’ (2013) – was originally registered with incorrect parentage. Correct information is: **Parentage:** *H.* ‘Candy Dish’ X [(*H. pycnophylla* X *H.* ‘Harvest Dandy’) X *H.* ‘Raspberry Sorbet’]

*H.* ‘**Deep Waters**’ (2014) – was originally registered with incorrect plant height. Correct information is: **Plant:** 47in (119.4cm) diameter; 27in (68.6cm) high

*H.* ‘**Domaine De Courson**’ (1996) – was originally registered with a typographical error and should have been registered as *H.* ‘**Domaine de Courson**’ (lower case “d” in the second word).

*H.* ‘**Franc’s Mor Blue**’ (2010) – was originally registered with a typographical error and should have been registered as *H.* ‘**Franc’s Mor Blu**’ (no “e” in the third word).

*H.* ‘**Golden Maple**’ (1980) – was originally registered with a typographical error for leaf length. Correct information is:

**Leaf:** 10in (25.4cm) long; 8in (20.4cm) wide

*H.* ‘**Miss Mitzi**’ (2016) – was originally registered with a spelling error. Champagne, IL should be Champaign, IL in both the Flower details and the Clump History.

*H.* ‘**Ohh! Blue Bounty**’ (2011) – was originally registered with an error in flower color. Correct information is:

**Flower:** .7in (1.8cm) long; white with light lavender streaking in middle interior of petals; tubular; Peosta, IA, June 1 to July 15

*H.* ‘**Oracle**’ (2003) – was originally registered with incorrect leaf length. Correct information is:

**Leaf:** 19in (48.3cm) long; 14in (35.6cm) wide

*H.* ‘**Paisley Art**’ (2012) – was originally registered with a Metric/English translation error in leaf sizes. Correct information is:

**Leaf:** 5.9in (15cm) long; 4.8in (12.2cm) wide

*H.* ‘**Ryans Big One**’ (1982) – was originally registered with a typographical error and should have been registered as *H.* ‘**Ryan’s Big One**’ (added apostrophe).

*H.* ‘**Schneekoppe**’ (2006) – was originally registered with a typographical error and should have been registered as *H.* ‘**Schneekuppe**’ (“uppe” instead of “oppe” at the end).

*H.* ‘**Silver Load**’ (1999) – was originally registered with a spelling error and should have been registered as *H.* ‘**Silver Lode**’.

*H.* ‘Sun Worshipper’ (2006) – was originally registered with a typographical error and should have been registered as *H.* ‘Sun Worshiper’ (one “p” in the second word).

*H.* ‘Tappen Zee’ (2004) – was originally registered with a spelling error and should have been registered as *H.* ‘Tappan Zee’.

*H.* ‘Uniquely Catawampus’ (2016) – was originally registered with parentage listed as unknown. Correct information is:

**Parentage:** *H.* ‘Curly Fries’ X *H.* ‘Riptide’

*H.* ‘Uppa Echelon’ (2013) – was originally registered with a typographical error and should have been registered as *H.* ‘Upper Echelon’ (“er” instead of “a” at the end of the first word).

*H.* ‘Vim and Vigor’ (2000) – was originally registered with incorrect leaf dimensions. Correct information is:

**Leaf:** 15.3in (38.7cm) long; 12.5in (31.8cm) wide

*H.* ‘Whirlwind’ (1989) – originally registered with limited information. Corrected details are as follows:

***H.* ‘Whirlwind’**

J. Kulpa (ONI) AHS (R)

**Plant:** 40in (101.6cm) diameter; 19in (48.26 cm) high; mound-like; fast growth rate.

**Leaf:** 8in (20.3cm) long; 6.5in (16.5cm) wide; 10 to 11 vein pairs; white with green veining; 1.5 to 2.5in (3.8 to 6.4cm) wide dark green, flat margins; slightly shiny on top; thin glaucous bloom underneath; broadly ovate with cordate base; lightly folded and wavy, moderately corrugated, some leaves have elongated twisted tips.

**Scape:** 25 to 30in (63.5 to 76.2 cm) high

**Flower:** lavender; tubular; July 15 to Aug 15

**Seed:** sometimes sets seed, viability unknown

**Clump History:** unknown history, widely available

**Notable Characteristics:** colorful foliage, thick substance and excellent growth rate.

**Parentage:** Parentage Unknown

**Seasonal Color:** center darkens to yellow, chartreuse or green depending upon light, temperature and age.

*H.* ‘Wunv’ (2016) – was originally registered with incorrect scape height. Correct information is:

**Scape:** 21 to 39in (53 to 100cm) high

The following table contains corrected leaf dimensions for thirty-one (31) cultivars registered with leaf dimensions that were either reversed during transcription, interpreted incorrectly, or originally provided with limited information.

Article 27.7 of the ICNCP states "*Names governed by the Code are not established if, at the time of publication, no plants for which the name is proposed existed.*" Thus, the following plants are being removed from the list of registered cultivars.

*H.* 'Gold Vein' [1988]

*H.* 'Kite' [1988]

To avoid confusion, *H.* 'Gold Vein' and *H.* 'Kite' will be unavailable for future registrations.

**H. 'Abundant Love'** D. & M. Beilstein (ONIR)  
**Plant:** 46in (116.8cm) diameter; 30in (76.2cm) high; mound-like; moderate growth rate.  
**Leaf:** 11in (27.9cm) long; 9in (22.9cm) wide; 12 to 14 vein pairs; intense powdery blue-green with flat margins; glaucous bloom on top; glaucous bloom underneath; broadly ovate with cordate base; moderately folded and deeply corrugated overall, with pointed leaf tips.  
**Scape:** 34 to 36in (86.4 to 91.4cm) high; powder blue  
**Flower:** 1.8in (4.5cm) long; near white; tubular; Mansfield, OH; 7/1 - 7/10 - 7/17  
**Seed:** sets viable seeds; green  
**Clump History:** original seedling; 17 years old; Mansfield, OH  
**Notable Characteristics:** Dense clump draws you closer to view leaves that are folded at the base as well as the leaf. Short scapes hold the almost white flowers just above the powdery blue leaves making it look like a bouquet. Abundantly elevates *H. 'Love Pat'* to the next level.  
**Parentage:** (*H. 'Love Pat'* x OP)

**H. 'Allo, Allo, Allo'** M. Gilligan (ONIR)  
**Plant:** 22in (55.9cm) diameter; 14in (35.6cm) high; upright; slow growth rate.  
**Leaf:** 7.5in (19.1cm) long; 5in (12.7cm) wide; 7 to 10 vein pairs; medium green with flat to slightly rippled margins; slightly shiny on top; slightly shiny underneath; ovate with cordate base.  
**Petiole Characteristics:** upright, smooth red petioles  
**Scape:** 13 to 16in (33 to 40.6cm) high; red  
**Flower:** 1.5in (3.8cm) long; medium lavender with translucent edges and variable lavender stripes towards the centre; tubular; Jan 15 to Feb 15; Winchester, New Zealand  
**Seed:** sets viable seeds; red and green  
**Clump History:** original seedling; 7 years old; Winchester, New Zealand; seeds obtained from A. Scheer  
**Notable Characteristics:** Clear, attractive green, tidy, upright plant with lower half of petioles showing red and nice twists on end of leaves.  
**Parentage:** (*H. 'Maya Kingsnake'* x OP)  
**Seasonal Color:** Holds clean green color all season

**H. 'Always and Forever'** G. R. Goodwin (ONIR)  
**Plant:** 36in (91.4cm) diameter; 14in (35.6cm) high; mound-like; moderate growth rate.  
**Leaf:** 9in (22.9cm) long; 8in (20.3cm) wide; 16 vein pairs; dark green; with .5 to .75in (1.3 to 1.9cm) wide, cream to white, slightly rippled margins; dull to slightly shiny on top; slightly shiny underneath; nearly round with cordate base; lightly cupped and intensely corrugated overall.  
**Scape:** 18 to 24in (45.7 to 61cm) high; green  
**Flower:** 1.5 to 2in (3.8 to 5.1cm) long; near white with lightly translucent margins; tubular; Jun 1 to Jul 15; Zionsville, IN  
**Seed:** sets viable seeds; green  
**Clump History:** original sport; 6 years old; Zionsville, IN  
**Notable Characteristics:** Nice contrast between the dark green leaf center and the creamy edge, with ample corrugation. Displays some splashing although not enough to make it truly splashed.  
**Parentage:** Sport of a splashed seedling of unknown origin  
**Seasonal Color:** Emerges with yellow margins that turn creamy to white later, center darkens as season progresses.

**H. 'American Angel'** V. Wade (ONI) R. & B. Schroeder (R)  
**Plant:** 60in (152.4cm) diameter; 24in (61cm) high; mound-like; moderate growth rate.  
**Leaf:** 12in (30.5cm) long; 11in (27.9cm) wide; 15 vein pairs; variable light green; with 1 to 3in (2.5 to 7.6cm) wide, dark blue-green, slightly rippled margins; dull on top; dull underneath; broadly ovate with cordate base; moderately wavy overall.  
**Scape:** 30 to 40in (76.2 to 101.6cm) high; blue-green  
**Flower:** 2.5in (6.4cm) long; near white; tubular; Jun 1 to Jul 15; Champaign, IL  
**Seed:** sets viable seeds; green  
**Clump History:** 1st gen div of original sport; 12 years old; Champaign, IL; (original sport is in Bellville, OH)  
**Notable Characteristics:** More blue than *H. 'Guardian Angel'* and holds the bluish-green color all season.  
**Parentage:** Sport of *H. 'Guardian Angel'*

**H. 'Asher'** C. Kwick (ONIR)  
**Plant:** 48in (121.9cm) diameter; 24in (61cm) high; upright; moderate growth rate.  
**Leaf:** 14in (35.6cm) long; 12in (30.5cm) wide; 16 to 18 vein pairs; slightly blue-green with slightly rippled margins; dull on top; glaucous bloom underneath; broadly ovate with cordate base; lightly cupped, wavy and corrugated overall.  
**Petiole Characteristics:** light green  
**Scape:** 30 to 40in (76.2 to 101.6cm) high; green  
**Flower:** 1.8in (4.4cm) long; near white with light lavender streaks on inside of its petals; tubular; Jul 15 to Aug 15; Eau Claire, WI  
**Seed:** sets seeds, viability not submitted

**Notable Characteristics:** Unusual seasonal variegation. Needs a lot of sun for good color. Larger leaves have wider, more irregular, dark green margins. Emerges late but lasts way into the fall. Deep leaf cupping occurs when plant is fully mature.  
**Parentage:** Sport of *H. 'Dean's List'*  
**Seasonal Color:** Emerges a rather dull gray/green color. Variegation starts in June becoming more pronounced through July. Best color and cupping occurs in August.

### F

**H. 'First Grandchild'** F. Nyikos (ONIR)  
**Plant:** 18in (45.7cm) diameter; 9in (22.9cm) high; rhizomatous; fast growth rate.  
**Leaf:** 3in (7.6cm) long; 2.1in (5.4cm) wide; 5 vein pairs; light green with .3in (.6cm) wide, creamy white, slightly rippled margins; dull on top; slightly shiny underneath; ovate with rounded base; lightly wavy overall.  
**Petiole Characteristics:** green leaf and creamy margin color extend down the petiole.  
**Scape:** 16 to 20in (40.6 to 50.8cm) high; green  
**Flower:** 1.8in (4.4cm) long; medium purple with darker purple veins; tubular; Jun 1 to Jul 15; Unionville, IN  
**Seed:** sets viable seeds; green  
**Clump History:** original sport; 5+ years old; Unionville, IN  
**Notable Characteristics:** Fast growing stable edged sport. This small hosta quickly carpets borders or acts as excellent understory for larger hosta.  
**Parentage:** Sport of *H. 'Ganny Sandy'*  
**Seasonal Color:** Maintains color throughout season.

**H. 'Flamenco Dancer'** D. Ruff (ONIR)  
**Plant:** 20in (50.8cm) diameter; 17in (43.2cm) high; mound-like.  
**Leaf:** 7in (17.8cm) long; 4in (10.2cm) wide; 6 to 7 vein pairs; yellow with slightly rippled margins; slightly shiny on top; dull underneath; ovate with cordate base; moderately wavy overall.

## 2017 REGISTRATIONS

**Petiole Characteristics:** dark purple  
**Scope:** 17 to 20in (43.2 to 50.8cm) high; dark purple  
**Flower:** 3in (7.6cm) long; medium lavender; tubular; Buffalo, MN; 9/15 - 9/22 - 10/10  
**Seed:** sets viable seeds; green  
**Clump History:** original seedling; 12 years old; Buffalo, MN

**Petiole Characteristics:** Petioles are the same color as the leaf  
**Scape:** 24 to 36in (61 to 91.4cm) high; green with some bronzing at leaf bracts  
**Flower:** 3in (7.6cm) long; fragrant; striped medium purple with white margins; tubular; Jul 15 to Aug 15; Unionville, IN  
**Seed:** Sets viable seeds; green  
**Clump History:** Original sport; 5 years old; Unionville, IN  
**Notable Characteristics:** All green sport that is more robust and slightly larger than its parent.  
**Parentage:** Sport of *H. 'Calamity Jane'*  
**Seasonal Color:** Color deepens to a very dark shiny green.

**H. 'Jane Sample'** F. Nyikos (ONIR)  
**Plant:** 36in (91.4cm) diameter; 18in (45.7cm) high; mound-like; moderate growth rate.  
**Leaf:** 8.5in (21.6cm) long; 6.5in (16.5cm) wide; 8 to 9 vein pairs; medium green; with .5in (1.3cm) wide, pale yellow slightly rippled margins; slightly shiny on top; slightly shiny underneath; broadly ovate; lightly folded overall.  
**Petiole Characteristics:** Leaf and margin coloration extends down the petiole.  
**Scape:** 24 to 36in (61 to 91.4cm) high; green with some bronzing at leaf bracts  
**Flower:** 3in (7.6cm) long; fragrant; striped medium purple with white margins; tubular; Jul 15 to Aug 15; Unionville, IN  
**Seed:** Sets viable seeds; green  
**Clump History:** Original sport 5 years old; Unionville, IN  
**Notable Characteristics:** Stable form of *H. 'Calamity Jane'*. The margin tends to be uniform in width but can become much wider for new leaves on fall growth.  
**Parentage:** Sport of *H. 'Calamity Jane'*  
**Seasonal Color:** Margins change to creamy ivory as season progresses, and margin width is wider on new fall foliage.

**H. 'Je Suis'** M. Gilligan (ONIR)  
**Plant:** 34in (86.4cm) diameter; 13in (33cm) high; mound-like; moderate growth rate.  
**Leaf:** 8.5in (22cm) long; 3.5in (9cm) wide; 7 to 9 vein pairs; bright yellow with slightly rippled margins; slightly shiny on top; very shiny underneath; lance-shaped with tapered base; moderately wavy overall.  
**Petiole Characteristics:** long, arching petioles with reddish tones on lower portion.  
**Scape:** 18 to 20in (45.7 to 50.8cm) high; yellow with red on lower portion.  
**Flower:** 1.8in (5cm) long; medium lavender with translucent edges, light purple stripe in center of petal, then white stripe, then

translucent (gives impression of multi-stripe); tubular; Jan 15 to Feb 15; Winchester, New Zealand  
**Seed:** sets viable seeds; light yellow to green  
**Clump History:** original seedling; 6 years old; Winchester, New Zealand; seeds obtained from J. Schwarz  
**Notable Characteristics:** Brassy yellow color on long narrow leaves - forms a dense fountain of many leaves. Starts upright before becoming more mound-like.  
**Parentage:** (*H. 'Ringtail'* x OP)  
**Seasonal Color:** Starts out a soft yellow getting brighter and richer yellow as the season progresses.

**H. 'Jet Black'** D. & M. Beilstein (ONIR)

# INTERNATIONAL REGISTRATION OF HOSTA CULTIVARS

**Minimum requirements for registration are:**

- This form with bold-faced items completed in their entirety
- Three digital photographs: one of the entire clump, one close-up showing a representative leaf, and one close-up of the flower. Please supply the photographer's name and approximate date each photo was taken, and do not reduce or compress the original file before submitting.
- Written permission from the originator (if other than the registrant)
- \$5 registration fee per cultivar name. Make check(s) payable to "The American Hosta Society"

**Optional:**

- Additional digital photo(s) showing unique plant characteristics

**Mail required items to:**

Hosta Registrar

Questions can be answered by calling **(816) 697-2007** or emailing [GiboshiGayle@gmail.com](mailto:GiboshiGayle@gmail.com)

Feel free to photocopy this form, or visit <http://www.hostaregistrar.org> for additional copies.

Terms used on this form can be found in *The American Hosta Society Glossary of Terms* at [http://www.hostaregistrar.org/hosta\\_terminology.html](http://www.hostaregistrar.org/hosta_terminology.html)

**Please Note:** Un-established cultivar names submitted for registration do not become established until they are published in the *Registrations* supplement of *The Hosta Journal*, accompanied by their description. However, cultivar names can become established outside this avenue by being published elsewhere prior to the publication date of the *Registrations* supplement (which could potentially negate your registration).
